## SUMMARY

Software Engineer focused on developing web applications, designing asynchronous architectures, and optimizing data pipelines (ETL). Practical experience deploying corporate solutions into production and international learning in Data Science.

## PROFESSIONAL EXPERIENCE

### Software Engineer Intern / Bachelor's Thesis | Pamesa Grupo Empresarial

Feb 2026 - May 2026

- **Developed an end-to-end BI platform** for corporate cybersecurity and designed an automated ETL pipeline (Python/PostgreSQL) to ingest 2,000 daily records.
- **Optimized system architecture** using Celery and Redis, delegating data processes to background workers to reduce dashboard refresh time by 50%.
- **Designed dynamic interfaces** using Django Templates and Tailwind CSS, enabling the security team to visually monitor and immediately detect anomalies.
- **Deployed services on corporate servers** using Docker for containerization and Nginx as a secure reverse proxy.

### Operario de Producción | Grupo Torrecid & Pamesa Grupo Empresarial

Veranos 2024 - 2025

- Team collaboration in an industrial environment, fast adaptation to new tasks, and hands-on problem-solving.

## PROJECTS

### Customé | JavaScript, React, Firebase

Sep 2025 - May 2026

- Collaborative Web SPA focused on real-time data synchronization. Implemented a client-side dynamic filtering algorithm to optimize performance and user experience.

### Mountain Race Management System | Java, Spring Boot, PostgreSQL, Bootstrap

Sep 2024 - May 2025

- Collaborative web platform built under a 3-tier architecture. Integrated Role-Based Access Control (RBAC), dynamic PDF generation, and asynchronous notifications.

## EDUCATION

### Universitat Jaume I

Sep 2022 - Jun 2026

Bachelor's Degree in Computer Science (Software Engineering Track)

### Università degli Studi di Milano | Erasmus+

Sep 2025 - Jan 2026

Master's level coursework taught in English, focusing on Data Science, NoSQL DBMSs, and Business Information Systems.

## TECHNICAL SKILLS

- Languages: **Java, Python, JavaScript**
- Databases: **PostgreSQL, MongoDB**
- Tools & environments: **Git, GitHub, Docker, Nginx**
- Web & backend: **HTML, CSS, Tailwind, Bootstrap, React, Django, Spring Boot**

## ADDITIONAL INFORMATION

### Languages:

- **Spanish** (native)
- **Valencian** (C1)
- **English** (C1)
- **Italian** (B1)

### Other:

- Driving License B
